Atlantic Cocoa Processing & Export Company

Unlike large producers of cocoa in Ivory Coast and Ghana, ACPEC envisions to lead efforts in promoting a niche organic cocoa product from Liberia. Our goal is to empower farmers within our community to produce organically certified and export ready cocoa. Not only this, but we aim to create jobs whilst advancing gender mainstreaming and youth participation in cocoa production.

Initially located in Bong and Nimba counties, we have now expanded operations to include Lofa county. We currently export to EU countries, but are eager to expand operations and enter the US market. We can guarantee a traceable and organic supply of cocoa to our consumers.

ADVANCING THE DEVELOPMENT

Baobab Exports LTD

Baobab Exports LTD is a joint partnership between two of Africa's leading baobab fruit producers, EcoProducts and B'Ayoba. We are the largest ethical and traceable Organic Baobab operation, and we work with more registered rural harvesters than any other baobab producer in Africa. Our baobab is sourced from organically certified production sites in Zimbabwe and South Africa, harvested by 4,500 trained and registered rural smallholder farmers.

What's more, our tracking and batch control systems follow the movement of our baobab from harvesting, processing, packing, right through to the finished product. This meaning that we have a fully traceable system. We cannot wait to share the nutritious value of baobab with you!

ADVANCING THE DEVELOPMENT

Cajou du Centre

Created in 2015, CAJOU DU CENTRE produces and processes organic cashew nuts into cashew kernels. Located 12km from the city of Sokodé, we operate on over 2000 hectares of land, of which we dedicate 553 hectares for the production of ECOCERT certified cashew nuts.

We are proud of our processing plant, which boasts a processing capacity of 1800 tones of cashew kernels a year. Our belief in social and gender inclusion means that over 80% of our 500 employees are women. Lastly, we have also obtained the African Cashew Alliance (ACA) seal certificate and are committed to the implementation of a quality approach in accordance with ISO 9001. Our next goal is to move towards securing an ISO 22000 certification.

Aid Right The Development

Coetzee Organic LTD

Coetzee Organic (Uganda) Ltd was established in 2016 and based in Uganda. We develop Organic and Fair Trade vanilla supply chains in collaboration with smallholder farmers. Creating socio-economic stability and rural poverty alleviation is the primary consequence of our activities, with our collective goal to produce the highest quality small holder grown vanilla in the world.

Supporting this goal, we have a well-motivated, knowledgeable and educated team, leaving no stone unturned and no effort to big or small to achieve this goal. Our core focus is the development of agricultural supply chains, and we pride ourselves on our ability to develop and build sustainable supply chains that support local communities. If you want to know more about our change initiatives, please do enquire for more information.

Faso Global

FASO GLOBAL has been producing fresh and dried mango for over 18 years. Since our founding, we have been exporting up to 100 tones of dried mango yearly, and we are aiming to increase this figure to 120 tones in 2023. We care about the environment and our social impact; and we do this by ensuring that all our farmers are supported to achieve BIO, FLOCERT, and Global Gap certification standards.

On top of this, we are also members of the "Association Vive L'Arboriculture" (AVLA) and every year, we monitor 600 hectares of orchards and 190 mango farmers for traceability purposes. Currently, we are exporting to Canada and the Netherlands, but we are determined to expand our network and collaborate with new companies to give people a taste of the delicious Burkinabé mango!

Aid to the Development

Fruits of Africa

Fruits of Africa is a Togolese company launched in 2019. We produce fresh organic pineapple sourced from small producer cooperatives in Danyi, at an altitude of 700m and 185km from Lomé. Every year, we process 5000 tones of smooth cayenne pineapple and process this into juice and dried pineapple.

On top of this, we are a fair and socially responsible company focused on the financial independence of our producers and women. This is why 10% of our profits are donated to our producer groups to encourage the further involvement of women in the pineapple producing community. Lastly, we are also ecologically responsible, and ensure that we preserve the biodiversity of our land by implementing a unique Waste Management Plan.

Green Face Trading

Green Face Trading plc. was established in 2018 with the objective of supplying honey and beeswax for local and export markets adhering to sustainable supply chain in natural forest ecosystem. We focus on creating commercialized youth beekeepers in natural forest area through engaging them in organic honey production. This model is designed to work with rural unemployed youth with no land, no job and no income.

We believe the community in the forest areas should have access to opportunities to be incentivized to conserve the forest. Our motto, 'no tree, no bee, no honey, no money' represents our company philosophy in such a way that we encourage planting and nurturing of the forest. Currently, we are exporting our organic produce to the EU, USA and Japanese markets.

Greenfields Bio Plantations

Starting with organic tea in 1992, Greenfields Bio Plantations is a pioneer producer, marketer and exporter of certified organic produce from Sri Lanka. Since then, we have been able to expand our portfolio to include herbs, spices, nuts and other refined organic products that have enabled us to gain a niche in a highly competitive global market.

At Greenfields, we implement a regenerative agricultural approach in our production systems. We feed our soil with organic compost and protect our top soil, while utilize tall forest trees to ensure moisture in the soil. Our people are paid for, and our children educated. This is the essence of Greenfield today, and we aim to produce ethical, fair, and regenerative organic produce.

ADVANCING THE DEVELOPMENT

Kentaste

Kentaste is the largest and most popular brand of coconut products in Africa. Since our founding in 2011, Kentaste has committed itself to enriching the lives of its farmers, team members, and loyal customers. How do we do this? By building sustainable and enduring relationships with all stakeholders to ensure that our locally sourced products are of the highest quality.

For over 11 years, Kentaste has grown to a production capacity of 100 tones, and 120 permanent employees. Our modern factory is located in Ukunda, Kenya, which is a short walk away from the beautiful Diana beaches Eastern Kenya. All of our products are manufactured locally, because we believe in local opportunity for local people. In fact, 100% of our coconuts are sourced within 100 miles from our factory.

Rose Eclat

Established in 1999, Rose Eclat is a fruit and vegetable processing company whose core business is drying and exporting. Located in Ouagadougou, Burkina Faso, we are a modern company who strive to promote the consumption of dehydrated and delicious products. With our young and dynamic team of over 200, of which 90% are women, we were awarded the 'Best Exporter 2017' by the Burkina Promotion and Export Agency.

Our products are sourced from our own family orchard and also from small producer associations across Burkina Faso. Importantly, we cover the entire value chain, from agricultural production to processing in the drying unit and export to local and international markets.

Serendipol

Born out of a tsunami relief project by Dr. Bronner's, Serendipol prides itself on being earth caretakers and community catalysts who build customer trust, earn the respect of farmers and foster resilient relationships that impact lives locally and globally. We are the first global coconut brand to be Regenerative Organic Certified, which has now become the highest standard for responsible agriculture worldwide.

Our communities mean everything to us. To date, we have worked with over 1,100 farms and their local communities and have invested €2.4 million in rural communities since 2007. Our mission is to nurture the earth and society, while contributing to the social development of Sri Lankans engaged in agriculture.

ADVANCING THE REGenerative FOOD SYSTEM

Shochoch Trading PLC

At Shochoch Trading, we are inspired by nature; and reflect the balanced interconnectedness of nature's biodiversity. All of our products are produced in Ethiopia's southwest Bench Sheko zone, known for its dense forests and wild products. The people in Bench Sheko cannot live without their forests, which is why they are committed to traditional farming methods which are pro-environmental and regenerative.

Our founders were born and raised within the Bench Sheko zone, which is why we know exactly what the region has to offer in terms of 100% organic wild, forest, and semi-forest coffee, spices, honey, fruits and grains. At Shochoch, we understand and support the conservation of biodiversity to ensure sustainable livelihoods through environmentally friendly business practices.

ADVANCING THE BENEFITS OF FORESTS

Skimmelberg

We are a well-established company that produces and sells quality packaged retail organic Buchu and Rooibos tea products. As both grower and processor of our own products, we can guarantee the highest standards are maintained along the entire production process. Today, both Buchu and Rooibos are cultivated on our farms, in a sustainable way to ensure adequate supply and simultaneous protection from over-exploitation in the wild.

We are passionate about what we do, and have therefore joined the Rooibos Biodiversity Initiative, which has been formed to combat against the concerning rate of transformation of endangered habitat in the Greater Cederberg Biodiversity Corridor.

Village Hope

Established in 2008, Village Hope is a social business committed to working with rural communities to reduce poverty. To do this, we produce specialty cocoa beans, buying directly from farmers through cooperatives that meet our strict child labour, quality, and transparency standards. What's more, we also re-invest 50% of our profits in community programs.

Since starting our activities in cocoa in 2018, we have worked with CBI Netherlands in the exclusive Cocoa Training Program. This has enabled us to have a significant impact in our communities, and we have purchased and exported over 50 tones of cocoa since operations began. We want to make a lasting impact, and it is for this reason that we have begun contributing to the Cocoa Initiative for Social Justice.

Advancing The Development

COLEAD

At COLEAD, we aim to facilitate and implement actions that increase the contribution and value of the agricultural sector in the achievement of the UN Sustainable Development Goals. This is why 'growing people' is our vision. We believe that a paradigm shift in the global agri-food model can only occur with a new and fresh generation of activists. Therefore, we operate mainly in sub-Saharan Africa, where the opportunities for sustainable development are as big as the challenges.

We work with companies, and teach them the technical skills they require to improve their economic performance and unlock the agri-food potential that currently remains untapped in developing countries. We do this by ensuring a harmonious balance between the businesses and the environment.

ADVANCING THE DEVELOPMENT

KOAN

The Kenyan Organic Agricultural Network is a membership organization spread throughout Kenya. We collaborate with producers, exporters, traders, and NGOs in promoting sustainable and regenerative agriculture across Kenya. In order to make our mission visible and tangible, we provide technical advice, training and business promotion services in the areas of improved processing technology, organic market development, and certification support including the development and implementation of Internal Control Systems (ICS).

Since 2004 we have been carrying out projects on behalf of international organizations and small producer groups to promote good practices in the production and processing of a number of product groups, most predominantly in fruit and vegetables.
