0. Summary overview, market update

- 1. Prices
 - * EU prices
 - * MS prices for major producers
- 2. Production (by variety + extreme weather events + stocks)
- 3. Trade
 - * Evolution of the trade balance
 - * Import monitoring
 - * Export development
- 4. Further detail on trade developments
- 5. Export diversification

0. SUMMARY OVERVIEW, MARKET UPDATE

RECENT DEVELOPMENTS – Marketing year 2020/21 and trends for 2021/22

- 1. The incoming 2021/22 crop for EU27 has been estimated at 11 619 tonnes; this is 5% higher than the preceding 5 year average and 10 % above the « small » crop of the past marketing year (data from WAPA for 20 MSs, from Eurostat for the remaining 7 MSs).
- 2. After two years of below average crop volumes and relatively high prices, the new marketing year could have prices coming to normal levels; in the case of Poland, the MS with the largest volume, prices moved already to close to average levels.
- 3. Export logistics is being a huge challenge in many parts of the world but the EU is relatively less affected by that situation.
- 4. The first year of the pandemia registered firm demand and the second year a coming back to normal levels.

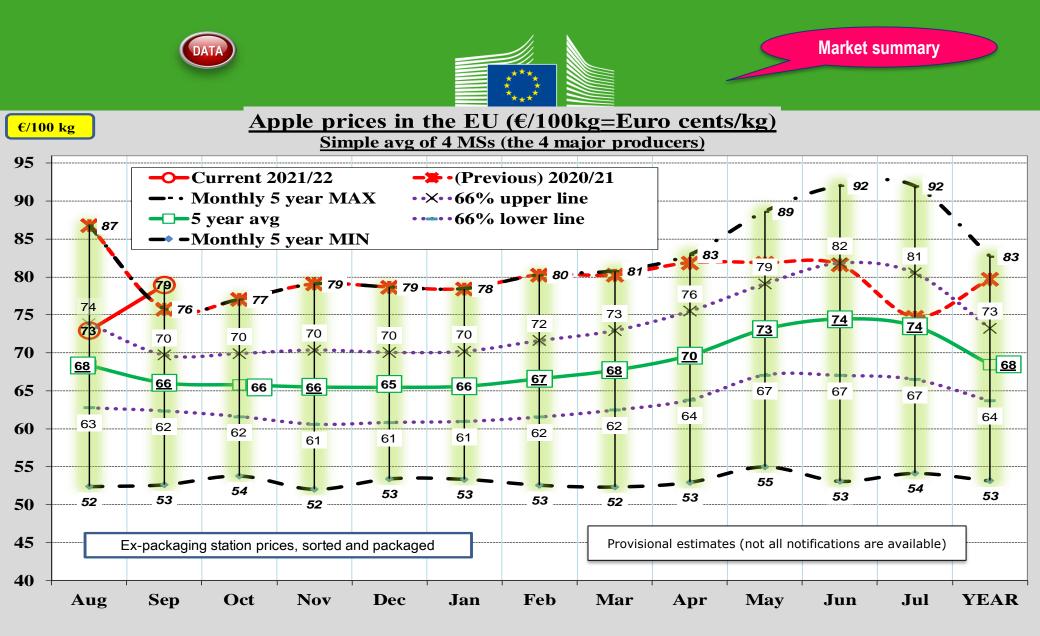

1. PRICES

1.1. EU Prices

- 1.2. MS prices for major producers
 - * Poland (1st EU28 volume producer)
 - * Italy (2nd)
 - * France (3rd)
 - * Germany (4th)

Provisional figures due to some pending notifications and retroactive updates

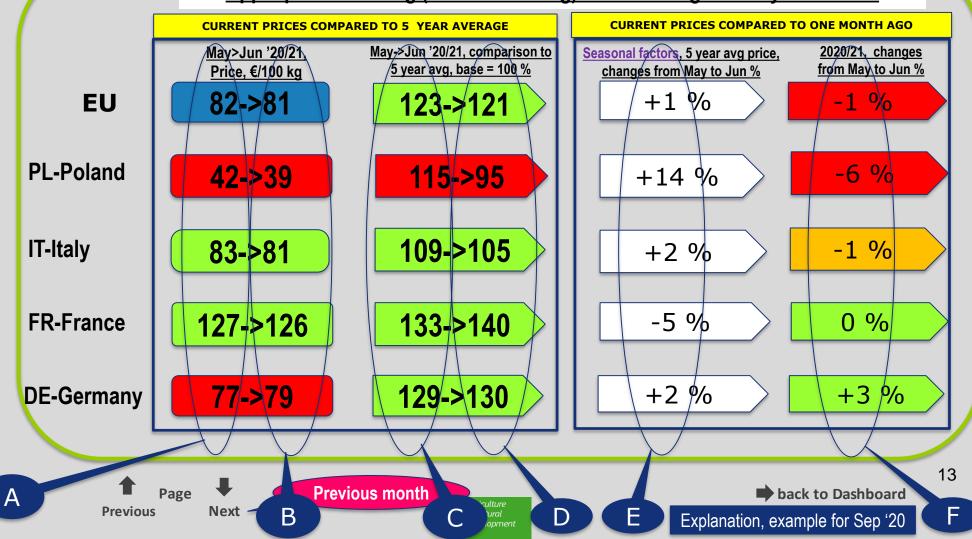

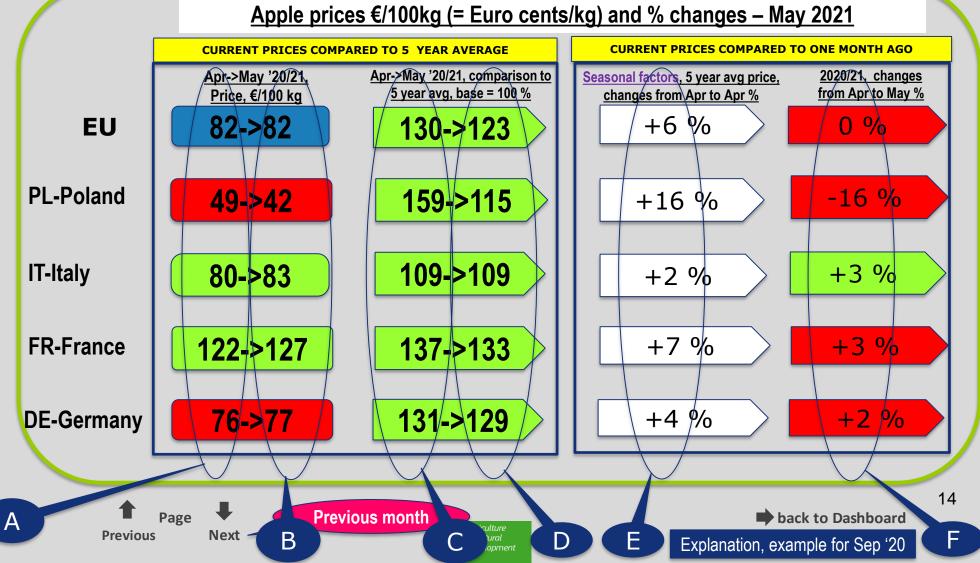

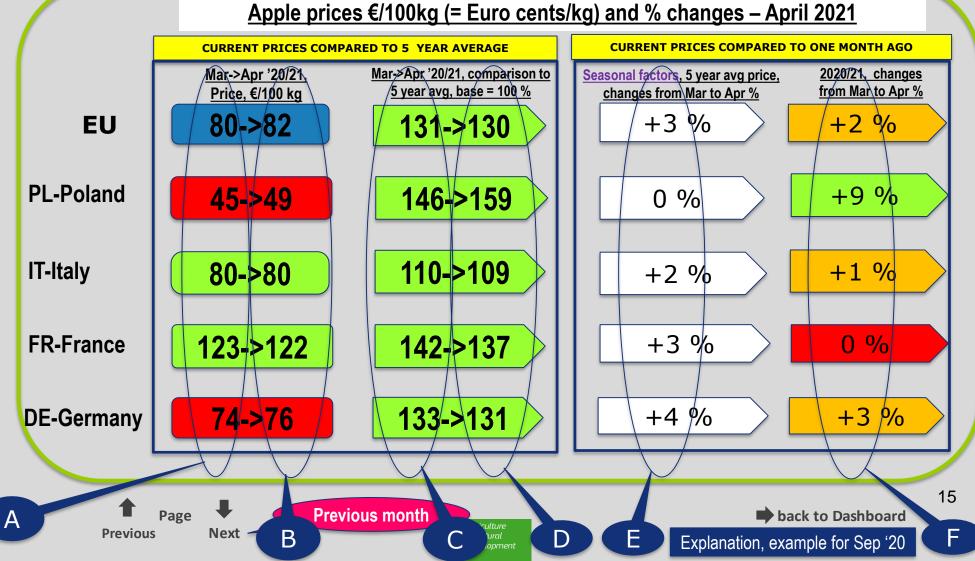

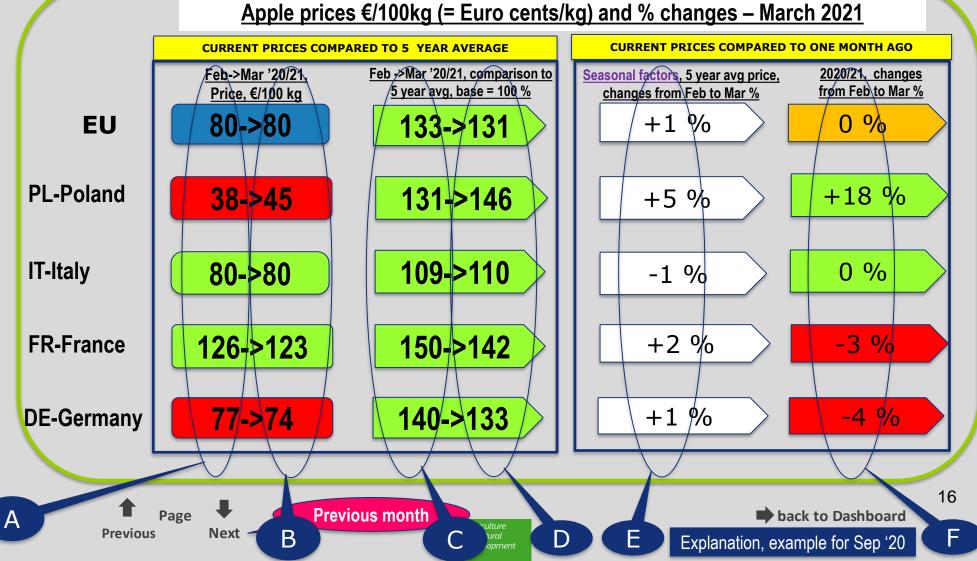

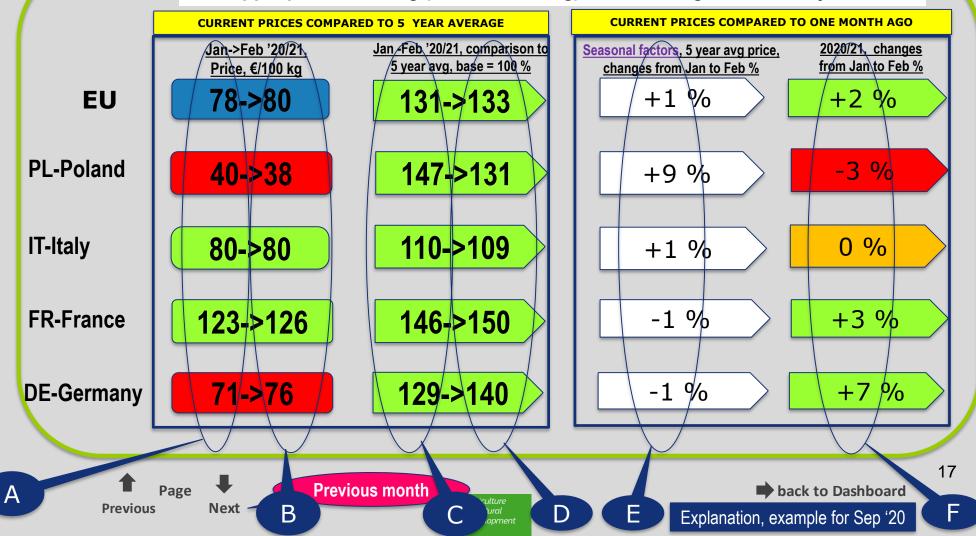

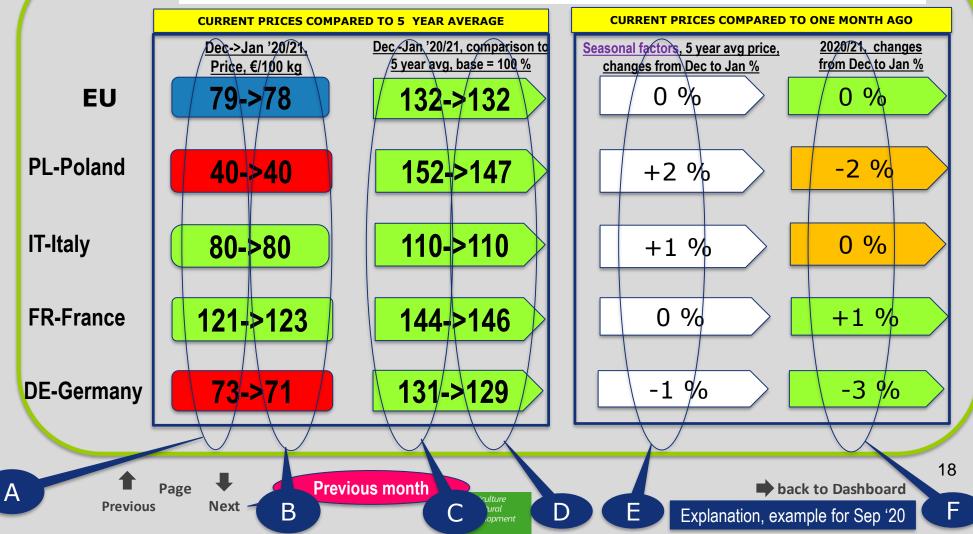

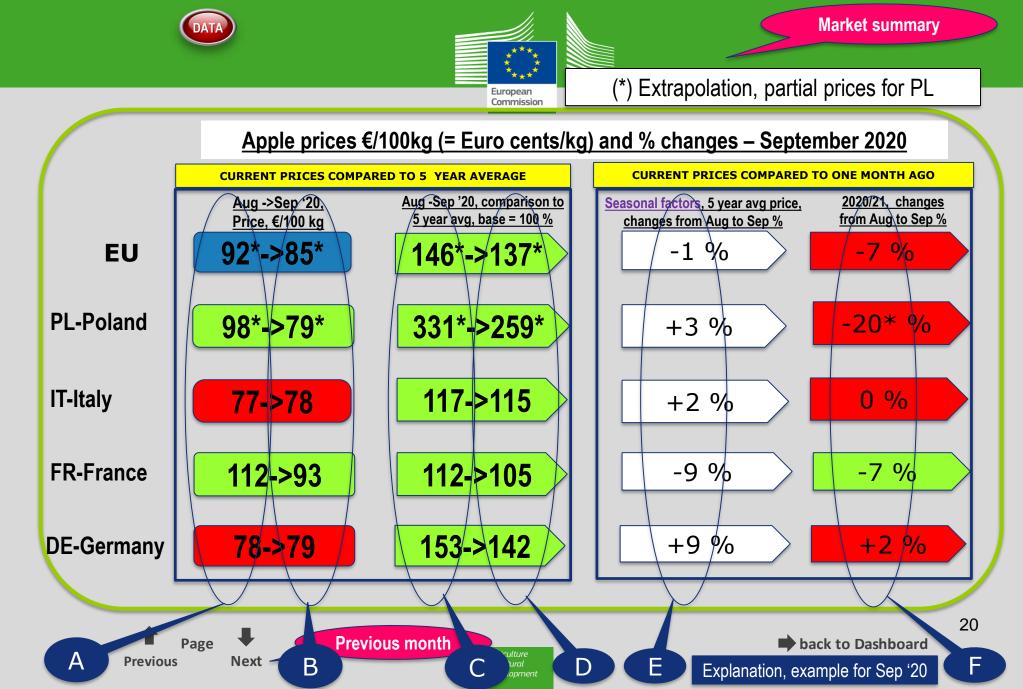

THE METHODOLOGY FOR MONTHLY ANALYSING PRICES

IS EXPLAINED IN THE NEXT TWO SLIDES WITH AN EXAMPLE

PRICE ANALYSIS (SHORT TERM), AN EXPLANATION BY EXAMPLE

What is found in the colums of montly price figures?

- 1. Column A: average monthly prices for August 2020 by Member State and in the EU;
- 2. Column B: average monthly prices for September 2020 by Member State and in the EU;
- 3. Column C: index of prices for August 2020 compared to the average prices of the 5 preceding years (base = 100);
- 4. Column D: index of prices for September 2020 compared to the average prices of the 5 preceding years (base = 100);
- 5. Column E: percentage change of prices in September compared to August for the average price of the 5 preceding years (<>seasonal factors);
- 6. Column F: percentage change of prices in September 2020 compared to August 2020.

Example for German prices (September 2020)

	Germany														
	2014/15 2015/16 2016/17		2017/18	2017/18 2018/19		Current 2020/21	5 year avg	% current year to histo. 5 year avg	% to preceding month in 5 year avg	% to preceding month in current year					
Aug	32.67	41.42	31.89	54.33	86.98	41.58	78.16	51	153						
Sep	29.56	43.74	39.37	73.28	69.76	52.32	79.36	56	142	9	2				

The monthly average price in Germany was 78 Euro cents per kg in August 2020 (column A). The equivalent price for September 2020 was 79 Euro cents per kg (column B). Therefore, the percentage change of prices (September compared to August) was a 2% increase (column F). We have 3 additional columns in order to check how the situation and recent price changes compare to the reference period (5 preceding years, 2015 to 2019). Column C indicates a figure of 153 for August; that means that the price of August 2020 was 1,53 times the price for the reference period in Germany. Column D indicates that the price for September 2020 was 1,42 times the price of the reference period. In column E we have a proxy indicator for price seasonality factors: for the reference period average German prices were 9% higher in September than in August (this is a sort of seasonal pattern that we take into account for column F). When results in column F are better than in E, the shape appears in green (in red in the opposite case).

Agriculture and Rural Development

World consumption of fresh apples 2019/20 (volume)

GENERAL REMARKS AND DISCLAMERS

1. Where EU28 is listed it should be read as "EU+UK"; since 1 February 2020 Comext data on EU27 is the standard default (1 January 2021 for Taxud data). In a few cases there is a need to check on the content of the slide to distinguish between EU28 and EU27 because an upgrade of apps may still be ongoing.

2. Due to different timings of data processing in different slides and some other factors, such as the intermediate data carrier and methodologies, some differences on figures referred to similar or almost identical indicators are possible.

3. This a working document intended for reflection and analysis not containing any official position of the European Commission.
