Disclaimer

Today's presentation includes forward-looking statements that reflect Dole plc's current views with respect to future events, financial performance and industry conditions.

These forward-looking statements are subject to various risks and uncertainties that may cause actual results to differ materially from those expressed or implied statements. Dole plc has provided additional information in its reports on file with the Securities and Exchange Commission concerning certain factors, risks and uncertainties that could cause actual results to differ materially from those contained in this presentation. These factors include but are not limited to the successful integration of the Total Produce ("TP") and Dole Food Company ("DFC") companies, weather conditions, natural disasters, crop disease, pests, other natural conditions and geopolitical risks, which may affect market prices and the demand for our products, and our ability to mitigate such risks, our ability to compete and innovate against our competitors, and increases in commodity or raw product costs that could adversely affect our operating results.

This presentation contains Pro-Forma ("PF") financial information. The unaudited pro-forma consolidated financial statements for Dole plc illustrate the estimated effects of the acquisition of DFC by TP as if it had occurred on January 1, 2020. This is comparable to the Pro-Forma presented in the Form F-1 filed with the SEC at the time of the IPO. Although we believe that the expectations reflected in this presentation are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Except as otherwise noted, these forward-looking statements speak only as of the date of this presentation, and we undertake no obligation to update or revise any of such statements to reflect events or circumstances occurring after this presentation.

In this presentation, we use certain non-GAAP performance measures to evaluate current and past performance and prospects for the future to supplement our GAAP financial information presented in accordance with GAAP. These non-GAAP financial measures are important factors in assessing our operating results and profitability. A reconciliation of non-GAAP measures to the most directly comparable GAAP measures is contained in Appendix III to this presentation.

Operational Review

Strategic Highlights – FY'21

- Price increases agreed across the business to mitigate inflationary pressures
- Synergies: Integration of management teams and progress being made in important areas
- Delivery of 2 new vessels - Dole Aztec and Dole Maya
- Successful replanting of 2,900 acres in Honduras following hurricane damage

Value-Added Salads

Product Recall & Temporary Plant Closures

Financial Impact of Recall & Temporary Plant Closures

	FY'21	FY'22E
Exceptional one-time costs	\$17.6m	~\$15.0m
Adjusted EBITDA impact	\$3.3m	~\$25.0m

- Initial voluntary recall announced December 2021 due to possible health risk from *Listeria*
- Temporary suspension at Bessemer City, NC and Yuma, AZ plants to facilitate investigation and sanitation procedures
- Subsequent recall announced January 2022 impacting Springfield, OH and Soledad, CA plants, after common harvest equipment identified as likely source of contamination
- This subsequent recall led to increased costs vs original expectations and uncertain timeline for resumption of full operations due to time taken to confirm harvest equipment as root cause through genetic testing
- Limited operations resumed mid January at Bessemer City and Yuma
- “Test and Hold” procedures remained in place until definitive root cause confirmed, leading to significant costs from reduced operating capacity, increased disposals, and delays in ability to adjust pricing with customers
- Harvest equipment contaminated with *Listeria* from natural environment ultimately confirmed as source and no source of contamination found in any Dole plants
- All plants now fully operational and price increases communicated
- Transition to normal profitability expected over FY'22

Fresh Fruit

Pro-Forma Revenue \$'m

Pro-Forma Adjusted EBITDA \$'m

Financial Commentary

- Q4'21 PF Revenue increased 6.9% primarily due to higher pricing in North America ("NA"), continued strong performance in commercial cargo and higher Pineapple volumes
- FY'21 PF Revenue increased 2.9% primarily due to higher pricing in NA and growth in commercial cargo
- Q4'21 PF Adjusted EBITDA down 10.3% due to continued impact of higher input and transportation costs
- FY'21 PF Adjusted EBITDA up 21.6% largely due to higher pricing in NA during H1 and strong performance in commercial cargo

Operational Update

- Abnormal year – Starting with supply challenges following hurricanes Iota and Eta in Q4'20 and moving to inflationary pressures in input costs and logistics in particular
- Price increases implemented in NA before year end and updated contracts for Europe started in January 2022
- Delivery of two new vessels: Dole Aztec and Dole Maya

Diversified Fresh Produce EMEA

Pro-Forma Revenue \$'m

Pro-Forma Adjusted EBITDA \$'m

Financial Commentary

- Q4'21 PF Revenue up 4.3% on prior year
- FY'21 PF Revenue 5.4% ahead of prior year driven by positive FX movements and strong performance across all channels
- Q4'21 PF Adjusted EBITDA increased 1.9% on prior year
- FY'21 PF Adjusted EBITDA increased 24.0% due to strong trading across the division and continued recovery in food service channels

Operational Update

- Reorganization of Dutch businesses contributed to strong growth
- Food service channel recovered in UK, Ireland and other markets

Diversified Fresh Produce Americas & ROW

Pro-Forma Revenue \$'m

Pro-Forma Adjusted EBITDA \$'m

Financial Commentary

- Q4'21 PF Revenue up 0.8% on prior year
- FY'21 PF Revenue increased 3.8% driven by strong performance of Berry category and growth in South American fruit exports
- Q4'21 PF Adjusted EBITDA increased 42.6% driven by strong starts to the Peruvian Grape season and Chilean Cherry season
- FY'21 Adjusted EBITDA declined 1.4% largely due to the impact of adverse weather events in early 2021 on the Chilean Grape season, offset by good performance in Berry and Cherry categories

Operational Update

- Severe rains in Chile affecting Grapes held back otherwise strong underlying growth
- Growth in key categories – Berries, Cherries
- Investment in packing and cooling assets

Fresh Vegetables

Pro-Forma Revenue \$'m

Pro-Forma Adjusted EBITDA \$'m

Financial Commentary

- Q4'21 PF Revenue decreased 8.5% primarily due to the impact of the Value-Added Salads product recall and temporary plant closures in December 2021
- FY21 PF Revenue up 1.0% due to higher pricing in Value Added Salads
- Q4'21 PF Adjusted EBITDA down due to the impact of the product recall and temporary plant closures, and continued weak Fresh Packed Vegetable markets
- FY'21 PF Adjusted EBITDA down due to significant inflationary pressure in Value Added Salads, weak Fresh Packed Vegetable markets and impact of the product recall and temporary plant closures

Operational Update

- Challenging year due to inflation and December recall and temporary plant closures
- Increased pricing early in response to increasing cost pressures but increasing again in 2022 due to continued escalation
- Value Added Salad plants all fully operational following temporary suspension

Reconciliation of Non-GAAP
Financial Measures to Related
GAAP Measures

Non-GAAP Measures

Dole plc's results are determined in accordance with U.S. Generally Accepted Accounting Principles ("GAAP").

In addition to its results under GAAP, in this Press Release we also present Dole plc's Adjusted EBITDA, pro-forma EBIT, pro-forma Adjusted EBITDA, pro-forma Adjusted net income attributable to Dole plc and pro-forma Adjusted Earnings per Share, which are supplemental measures of financial performance that are not required by, or presented in accordance with, GAAP.

Adjusted EBITDA is calculated from EBIT before discontinued operations by: (1) adding depreciation charges; (2) adding amortization charges; (3) adding merger, transaction and other related costs; (4) adding the net unrealized loss or subtracting the net unrealized gain on derivative instruments; (5) adding the net unrealized loss or subtracting the net unrealized gain on foreign denominated borrowings; (6) adding the net realized loss or subtracting the net realized gain on noncash settled foreign denominated intercompany borrowings; (7) adding or subtracting fair value movements on contingent consideration; (8) adding impairment charges on property, plant and equipment; (9) adding or subtracting asset write-downs, net of insurance proceeds; (10) adding incremental costs for produce recalls and related costs; (11) subtracting the fair value gain or adding the fair value loss on the acquisition of investments previously accounted for under the equity method; (12) subtracting the gain or adding the loss on the sale of investments accounted for under the equity method; (13) subtracting the gain or adding the loss on the disposal of business interests; (14) adding the loss or subtracting the gain on asset sales for assets held-for-sale and actively marketed property; (15) adding the incremental costs from the fair value uplift for biological assets and inventory related to the acquisition of Legacy Dole; (16) adding restructuring charges; (17) adding costs for legal matters not in the ordinary course of business; and (18) adding costs that are directly related to the COVID-19 pandemic, and are as follows: costs that are (i) incremental to charges incurred prior to the outbreak, (ii) not expected to recur once the crisis has subsided and operations return to normal, and (iii) clearly separable from normal operations. Costs related to COVID-19 are not added back after the fourth quarter of 2020. It also includes the effect of the Company's share of all listed items within investments accounted for under the equity method.

Pro-forma EBIT before discontinued operations is calculated from pro-forma net income (loss) by adding pro-forma interest expense from continuing operations, adding the pro-forma income tax expense or subtracting the pro-forma income tax benefit from continuing operations, and adding any applicable pro-forma net loss from discontinued operations.

Pro-forma Adjusted EBITDA is calculated from pro-forma EBIT before discontinued operations by: (1) adding depreciation charges; (2) adding amortization charges; (3) adding merger, transaction and other related costs; (4) adding the net unrealized loss or subtracting the net unrealized gain on derivative instruments; (5) adding the net unrealized loss or subtracting the net unrealized gain on foreign denominated borrowings; (6) adding the net realized loss or subtracting the net realized gain on noncash settled foreign denominated intercompany borrowings; (7) adding or subtracting fair value movements on contingent consideration; (8) adding impairment charges on property, plant and equipment; (9) adding or subtracting asset write-downs, net of insurance proceeds; (10) adding incremental costs for produce recalls and related costs; (11) subtracting the fair value gain or adding the fair value loss on the acquisition of investments previously accounted for under the equity method; (12) subtracting the gain or adding the loss on the sale of investments accounted for under the equity method; (13) subtracting the gain or adding the loss on the disposal of business interests; (14) adding the loss or subtracting the gain on asset sales for assets held-for-sale and actively marketed property; (15) adding the incremental costs from the fair value uplift for biological assets and inventory related to the acquisition of Legacy Dole; (16) adding restructuring charges; (17) adding costs for legal matters not in the ordinary course of business; and (18) adding costs that are directly related to the COVID-19 pandemic, and are as follows: costs that are (i) incremental to charges incurred prior to the outbreak, (ii) not expected to recur once the crisis has subsided and operations return to normal, and (iii) clearly separable from normal operations. Costs related to COVID-19 are not added back after the fourth quarter of 2020. It also includes the effect of the Company's share of all listed items within investments accounted for under the equity method.

Pro-forma Adjusted Net Income attributable to Dole plc is calculated from pro-forma net income (loss) attributable to Dole plc by: (1) adding the loss from discontinued operations, net of income tax; (2) adding intangible asset amortization charges; (3) adding merger, transaction and other related costs; (4) adding net unrealized loss or subtracting the net unrealized gain on derivative instruments including interest rate swaps; (5) adding the net unrealized loss or subtracting the net unrealized gain on foreign denominated borrowings; (6) adding the net realized loss or subtracting the net realized gain on noncash settled foreign denominated intercompany borrowings; (7) adding or subtracting fair value movements on contingent consideration; (8) adding impairment charges on property, plant and equipment; (9) adding or subtracting asset write-downs, net of insurance proceeds; (10) adding incremental costs for produce recalls and related costs; (11) subtracting the fair value gain or adding the fair value loss on the acquisition of investments previously accounted for under the equity method; (12) subtracting the gain or adding the loss on the sale of investments accounted for under the equity method; (13) subtracting the gain or adding the loss on the disposal of business interests; (14) adding the loss or subtracting the gain on asset sales for assets held-for-sale and actively marketed property; (15) adding the incremental costs from the fair value uplift for biological assets and inventory related to the acquisition of Legacy Dole; (16) adding restructuring charges; (17) adding costs for legal matters not in the ordinary course of business; (18) adding back the expense or subtracting the benefit of U.S. Tax Reform discrete income tax expense (benefit); and (19) adding costs that are directly related to the COVID-19 pandemic, and are as follows: (i) incremental to charges incurred prior to the outbreak, including incremental costs related to personal protective equipment and transportation, and direct costs due to lower production capacity from a plant shutdown, (ii) not expected to recur once the crisis has subsided and operations return to normal, and (iii) clearly separable from normal operations. Costs related to COVID-19 are not added back after the fourth quarter of 2020. It also excludes the tax effect and the effect attributable to non-controlling interests share of such items. It also includes the effect of the Company's share of all listed items within investments accounted for under the equity method.

Non-GAAP Measures *(continued)*

Pro-forma Adjusted Earnings per Share is calculated from pro-forma Adjusted Net Income attributable to Dole plc divided by diluted weighted average number of shares in the applicable period.

However, pro-forma EBIT before discontinued operations, Adjusted EBITDA, pro-forma Adjusted EBITDA, and pro-forma Adjusted Net Income attributable to Dole plc are not measurements of Dole plc financial performance under GAAP and should not be considered as alternatives to net income attributable to Dole plc, net income, income (loss) from continuing operations or any other performance measures derived in accordance with GAAP. Additionally, pro-forma EBIT before discontinued operations and pro-forma Adjusted EBITDA are not intended to be liquidity measures because of certain limitations such as:

- They do not reflect Dole plc's cash expenditures, or future requirements, for capital expenditures or contractual commitments;
- They do not reflect changes in, or cash requirements for, Dole plc's working capital needs;
- They do not reflect the significant interest expense, or the cash requirements necessary to service interest or principal payments, on Dole plc's debt; and
- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and these non-GAAP measures do not reflect cash requirements for such replacements.

Because of these limitations, pro-forma EBIT before discontinued operations and pro-forma Adjusted EBITDA should not be considered as measures of discretionary cash available to Dole plc to invest in the growth of its and Dole plc's business.

Further, pro-forma EBIT before discontinued operations, pro-forma Adjusted EBITDA, and pro-forma Adjusted Net Income attributable to Dole plc as used herein may not be calculated in a similar manner to, and are therefore not necessarily comparable with, similarly titled measures of other companies. However, we have included pro-forma EBIT before discontinued operations, pro-forma Adjusted EBITDA, and pro-forma Adjusted Net Income attributable to Dole plc herein because Dole plc's management believes that pro-forma EBIT before discontinued operations, pro-forma Adjusted EBITDA, and pro-forma Adjusted Net Income attributable to Dole plc are useful performance measures for it. These non-GAAP financial measures have limitations as analytical tools, and you should not consider them in isolation or as a substitute for analysis of our operating results, cash flows, or any other measure prescribed by GAAP.

Dole is not able to provide a reconciliation for FY'22 Adjusted EBITDA without undertaking unreasonable efforts.
