³⁴ The category of companies limited by guarantee (CLG) is categorised as “limited” if a significant shareholder (>25% ownership) is identified as “public sector” if it is a development agency and “other legal person” otherwise.

³⁵ Several beneficiaries containing the same identifying words may be classified as different types, as the full legal forms are often not given in these countries and additional information was gathered to identify them. Examples of common identifiers include “and sons”, “estate”, “farm” and “partnership”.

³⁸ Several beneficiaries containing the same identifying words may be classified as different types, as the full legal forms are often not given in these countries and additional information was gathered to identify them. Examples of common identifiers include "and sons", "estate", "farm" and "partnership".

End notes

- The order of first and last names of natural persons may vary (i.e. the information is presented in the same form as in the reporting systems or company registers). Similarly, the language follows also the reporting systems or company registers and is in some cases complemented with the translation in the Latin alphabet between brackets.
- For the ultimate beneficiaries categorised as limited liability companies marked with an asterisk (*), information on the ultimate owner is uncertain as the beneficiary was not matched with an entry reported in any of the national business registers.
- “No ownership information available” indicates that business registers do not provide sufficient information to determine the ultimate beneficiary.
- “Beneficiary not identified in registers” indicates that the direct beneficiary was not matched with any entry of the national business registers.
- “Dispersed ownership” indicates that no stakeholder controlling at least 25% of the ownership rights is identified in the business registers.

This report provides the findings of the study on “The Largest 50 beneficiaries in each EU Member State of CAP and Cohesion Funds” prepared at the request of the CONT committee.

Based on the analysis of more than 12 million beneficiaries of the common agricultural policy (CAP) in 2018 and 2019 and about 600 000 beneficiaries receiving Cohesion funds between 2014 and 2020 it identifies the largest direct and ultimate beneficiaries of EU funds. Moreover, it covers the results of an assessment of almost 300 reporting systems for the public disclosure of the beneficiaries of CAP and Cohesion policy. Finally, it provides recommendations to enhance the public disclosure on beneficiaries of EU funds.
